

Stork GOAL Joint Venture Australia

40 personnel | 70,000 work-hours p/a | 325,000 kms driven p/a

The Project

After over a decade as the Industrial Services contract holder with SHELL QGC, within their Coal Seam Gas Upstream operations in Queensland Australia, Stork Technical Services Australia entered into a Joint Venture partnership with a leading Australian indigenous company, [Goal Indigenous Services](#).

The resulting partnership, STORK GOAL Joint Venture (SGJV), was successful in retaining this contract. Services include scaffold, industrial coatings and insulation for over 3,000 gas well and 40 gas processing facilities across the Surat Basin - a region spanning more than 49,000km².

HSE Excellence

Over the past five years Stork and SGJV have driven over 1 million kms and executed a combined 410,000 man-hours, incurring only 4 x First Aid Cases and 1 x Medical Treatment Case (*timber splinter, May 2018*).

Cultural Integrity

Adding to the HSE Excellence that the team continues to display is SGJV's passion for building community engagement and employment opportunities with 11% of the workforce indigenous.

Recognition & Awards

Recent recognition came in 2020 with SGJV being 'Highly Commended' as an Exceptional Indigenous Business in the Queensland Resources Council Indigenous Awards, as well as a 'Finalist' in Stork's Safer Together Annual Awards.
